

Project Proposal & Software Requirements Specification

for Alumni/Old Students
Association Web Platform

Prepared for: MUSGAAU

Project Proposal & Software Requirements Specification

Project: Alumni/Old Students Association Web Platform

Prepared for: Muslim Graduates of Adekunle Ajasin University (MUSGAAU)

Prepared by: What If? Labs

Date: 5th December, 2025

1) Executive Summary

This proposal outlines the development of a modern, secure, and easy-to-manage web platform for MUSGAAU. The platform is designed to support the Union's core operational needs: managing membership records, overseeing dues, and publishing official updates and announcements.

The system prioritizes simplicity, administrative control, and durability. It equips MUSGAAU with the essential digital foundation required for structured communication, transparent operations, and efficient member management.

2) Objectives

- Establish a unified digital registry for all members
 - Provide a structured onboarding and verification process
 - Enable administrators to publish official posts and announcements
 - Offer members a dashboard to stay informed and track their dues status
 - Support clear and organized dues management managed entirely by authorized admins
-

3) Scope of Work

3.1 Core Features

1. Authentication & User Management

- Secure login via email/phone
- Password reset
- Role-based access control: Member, Admin, Super Admin
- Admin verification and onboarding workflow
- Member profiles with personal, academic, and contact information

2. Membership Directory

- Centralized list of registered members
- Profile viewing and editing (self + admin)
- Member status categories: active, inactive, pending approval
- Search and filtering tools for admins

3. Dues Management

- Configurable dues amounts and billing periods
- Member visibility into current dues status
- Admin ability to update payment status

4. Official Posts & Announcements

Administrators can publish structured posts covering:

- General announcements
- Events and activities
- Union projects
- Fundraising information (informational only)
- Jobs and opportunities

Posts may include text, images, links, and attachments. Members have view-only access.

5. Public-Facing Pages

- Home
- Members
- About
- Contact
- Selected posts made available publicly at admin discretion

6. Member Dashboard

- Latest official posts
- Dues status and reminders
- Profile overview

7. Admin Dashboard

- Comprehensive member management
- Dues configuration and payment status updates
- Post creation and editing tools

4) User Roles & Permissions

Member

- View posts and announcements
- View dues status

- Update own profile
- Access personalized dashboard

Admin

- All Member capabilities
- Approve and manage members
- Create, edit, and remove posts
- Update dues payment statuses

Super Admin

- All Admin capabilities
 - Assign or revoke admin privileges
 - Manage global system configurations
-

5) Information Architecture

Public Area

- Home
- About
- Contact
- Public Posts (if enabled)

Member Area

- Dashboard
- Posts
- My Dues
- Profile

Admin Area

- Members Management
 - Posts Management
 - Dues Management
-

6) Core User Journeys

Member Registration & Approval

A prospective member submits registration → Admin reviews and approves → Member gains access to dashboard and features.

Dues Tracking Workflow

Admin defines dues → Member views dues status → Member pays → Record is updated.

Admin Posting Workflow

Admin drafts a post → Publishes it → Members receive updated information through their dashboard.

7) Technology Stack

- Frontend: Vue 3, Nuxt, Tailwind CSS
 - Backend: Node.js (Express/NestJS)/Headless CMS
 - Database: PostgreSQL/Supabase/Firebase
 - Hosting: Affordable managed cloud environment
 - Security: Role-based access control, encrypted storage, secure authentication
-

8) Non-Functional Requirements

- Secure data handling and authentication
 - Responsive interfaces for desktop and mobile
 - High availability and reliability
 - Clear and maintainable architecture
-

9) Deliverables

- Fully functional web platform
 - Member and admin dashboards
 - Admin tools for posts and dues
 - Setup guides
 - UI/UX mockups for principal screens
-

10) Pricing

Below is the recommended pricing structure for the defined scope:

Project Cost Breakdown

- Design & UX: ₦800,000
- Development & Testing (Frontend, Backend, Admin, Membership Dashboard): ₦3,200,000
- Domain (Paid yearly): To be determined by provider
- Hosting/Infra (Monthly estimate): Pay-as-you-go (to be decided)
- Platform Maintenance and Support (Monthly):
 - Silver: ₦150,000 (business hours)
 - Gold: ₦250,000 (extended)
 - Platinum: ₦400,000 (24/7)

Payment Plan

- Client (You) pay 40% Upfront
- After the UI/UX Design you pay to make up 70%
- After Development, 100% payment is made before deployment.
